

### LEZIONE 3:

**Creazione e configurazione di una rete con 2 switch e 3 host per ogni switch.**

**L'indirizzo IP della LAN è: 192.168.1.0**

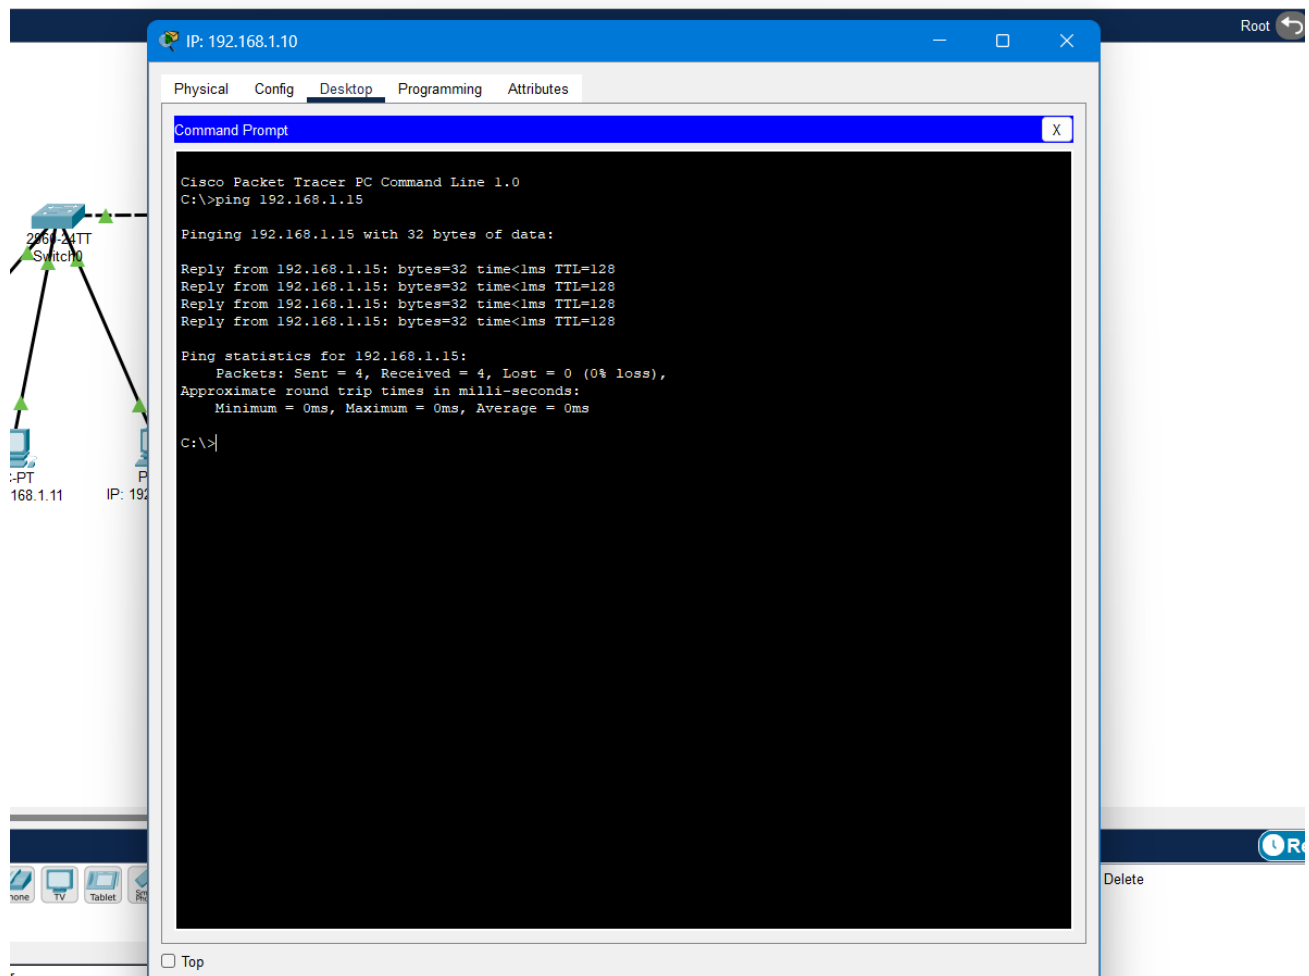

**La netmask è 255.255.255.0**

**Al primo pc è stato assegnato l'host id 10 ai rimanenti 5 pc l'host id è stato assegnato in ordine crescente.**

**I 2 switch sono collegati tra loro tramite la porta gigabit ethernet 1.**

**Per testare la comunicazione tra gli host ho usato dal pc 192.168.1.10 il comando:  
ping 192.168.1.15**

**Per controllare che la comunicazione avvenisse anche tra i due switch.**

**Per testare la comunicazione tra tutti gli host ho inviato un segnale broadcast**

**Dal pc 192.168.1.10 utilizzando il comando: ping 192.168.1.255**

**Essendo il cidr della maschera /24 il calcolo della conversione binaria (  $32-24=8$  )**

**$2^8=256$  lascia come primo numero ( 0 ) assegnato alla rete e l'ultimo al broadcast (255) .**
